BRUNO GRIFO

@ leitaogrifo@gmail.com +351 914799585 Lisbon, Portugal

EDUCATION

Masters degree, Informatics Engineer, Software Engineer — **University of Coimbra**
2018 – 2020

Bachelor degree, Informatics Engineer — **University of Coimbra**
2014 – 2019

EXPERIENCE

Software Engineer
BJSS

Nov 2021 – Present Lisbon, Portugal

- Rationalisation of 212 AWS Lambdas from over 400 repositories into a monorepo architecture for a CRM integration platform used by the aviation company system. The goal was to simplify maintenance and fix nearly 500 critical cyber vulnerabilities through easier deployment, testing, and monitoring.
- Migrated services from on-premises to the cloud. Update the services to redirect dependencies and other integrations from on-premises to the cloud, as well as to create the deployment files for the pipelines.
- Develop modern version of Socrates. Specsavers Key Application used by their staff in every store worldwide. We were responsible for creating a like-for-like replacement of the old Socrates with a different, modern tech stack while keeping the user interface to look and act just like the old solution.

Technologies: Microservices, Spring Java, GraphQL, REST, SQL, Git, Azure, AWS Lambda

Software Developer
Alter Solutions

Nov 2020 – Aug 2021 Lisbon, Portugal

Develop ETL processes to handle customer consumption data from smart meters. This data was then used in their energy prediction models, helping the client to avoid buying or generating too much or too little energy, leading to substantial cost savings. Also reported data as dashboards to help the leadership make better decisions.
Technologies: Python, SQL, Git, JIRA

Master's Internship
10.digital

Sep 2019 – Nov 2020 Coimbra, Portugal

Developed a platform (i. e. backoffice) for Inbound Marketing. This platform is marketed and used by 10.digital, which allows you to create and publish different types of marketing campaigns to generate leads (i. e. potential clients). The data collected by the campaigns, is processed by the system and represented through reports that helps the backoffice users to generate leads and create personality profiles, understand market trends and optimize other new campaigns.
Technologies: Django, Python, Celery, Git, JQuery/JavaScript, HTML/CSS, PostegreSQL

MAIN SKILLS

Microservices, Spring Java, SQL, GraphQL, REST, Git, Agile

ACTIVITIES

HYP, Summer Intern

2018 Coimbra, Portugal

Created a Chrome extension to integrate some specific features of a Ruby on Rails internal project, in the browser.

JEST

2017-2020 Coimbra, Portugal

JEST is a Junior Enterprise for Science and Technologies with core business in data-science and helping the student community.

Informatics Students Association

2018-2020 FCTUC

Volunteer
Banco Alimentar

2002-2016 Coruche, Portugal

Scout
Corpo Nacional de Escutas

2001-2018 Coruche, Portugal

INTERESTS

Career: Microservices, Concurrency, Event driven architectures, Multi-threads, Optimization.

Hoobies: Climbing, Tennis, Padel, Running, Traveling, Miniprojects.
